# EDGE PROTECTION BARRIER SYSTEM

Passive Fall Prevention Solutions

Guardian is proud to be the world's largest independent height safety brand. We serve our partners around the globe with a 360-degree height safety offer that includes fall protection, dropped object prevention and foreign material exclusion products, comprehensive training programs, and unique engineered systems solutions.

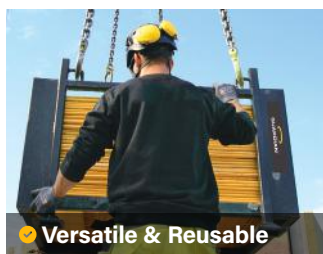

Guardian's new Edge Protection Barrier System for perimeters and interior voids offers premium safety solutions, comprehensive ease of use, and unprecedented re-usability. Supported by industry-leading end-to-end project management from Guardian's expert Engineered

Systems team, we streamline the process from design and quotation to product delivery and installation to ensure a seamless workflow. From conception to completion, Guardian is dedicated to ensuring that clients' edge protection needs are not only fully met but far exceeded.

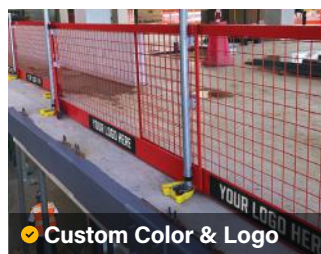

✓ Easy Install & Removal

Engineered with ease of use in mind. One person installation and removal using minimal, or no tools saves valuable time and resources.

✓ Versatile & Reusable

Lightweight yet durable all-metal construction allows for years of easy transport, storage and re-usability within and across project sites.

✓ Custom Color & Logo

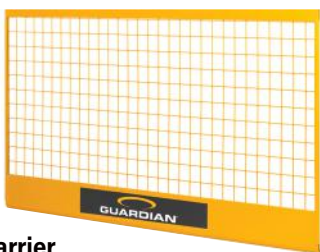

Select your company's color and add your logo to turn a safety solution into a branding opportunity on all your construction projects.

✓ Planning & Logistics

Comprehensive support, including project planning and logistics assistance. We aim to simplify your process and ensure a smoother workflow.

## Edge Protection Barrier System | Products

### Barrier

4 ft 3", 6 ft 4" and 8 ft 6" lengths.

### Clamp 550

Non-penetrating clamp for connecting to slabs, stairs, parapets and other structural elements.

### Standard Post

Used in conjunction with sockets and brackets (not required with compression post).

### Ground Support Plate

Can be used as part of a warning line or guardrail system.

### Precast Concrete Socket

### Compression Post

Non-penetrating post used between floors.

### Post Foot

Single bolt connection to concrete, steel, or wood substrates.

### Sheet Pile Bracket

Attaches to steel sheet pile using a single screw clamp and no additional tools.

### Balcony Bracket

Clamp-on connection designed specifically for balcony edge protection.
